General Instructions for filling in the application form

This application form is part of the "application pack" for INTERREG IVC applicants. Before filling in this Form, please also read all programme related documents, especially:

- a) the INTERREG IVC **Operational Programme** and
- b) the **programme manual**.

In particular, the programme manual will provide you with further guidance on the way to develop an INTERREG IVC project and to prepare the application form. The two above mentioned documents are available on the programme web site (www.interreg4c.eu).

Paper version

Application form

The application form must be completed, printed out, dated, signed by a duly authorised representative of the Lead Partner, and stamped with the stamp of the Lead Partner's institution. It should be sent together with the annexes (co-financing statements) by mail/courier to the INTERREG IVC Joint Technical Secretariat (JTS) at the latest by the end date of the call. This will be checked through the date of postal stamp on the envelope. The JTS address can be found on the programme's web site: www.interreg4c.eu

Co-financing statements

Co-financing Statements in original or fax version must be included in the mail sent to the JTS for all partners listed in Section 5 of the application form. The standard form of the co-financing statement available on the Programme website must be used, no amendments to the text are allowed. Any amendments to the text of the form will lead to the ineligibility of the application. The amount of national co-financing indicated in the co-financing statements must be **identical** to the amount indicated for each partner in section 5 of the application form.

Electronic version

An electronic version of the completed application form must be sent by email to the JTS at the latest by the end date of the call at the following address: application@interreg4c.eu

The electronic and paper version of the application form must be identical.

Technical instructions

- Applicants are asked to complete only the white fields of this application form. For technical reasons, most of the white fields have been split up into 2 or 3 sub-fields. As soon as the first sub-field is filled in, please continue in the next sub-field.
- Grey fields are not to be completed. For the grey fields, certain information will automatically be transferred to these sections after details are entered in other fields of the application form. Formulae for automatic calculations have been included in the relevant fields. These fields cannot be changed or edited.
- All input fields (white fields) are locked in order to ensure that all applicants have the same amount of space for describing their project and answering the questions. The number of characters (with spaces) is limited to 1000 characters per field. Any text exceeding this space will not be visible in the printout and therefore cannot be taken into account when assessing the operations.
- All input fields must be filled in unless stated otherwise in the instructions field. As different Sections of the application form depend on the type of interventions, it is strongly recommended that the applicants start by selecting the type of intervention they are applying to.
- Certain questions in the application form must be answered by marking a tick-box. When clicking on the box, an arrow will appear. Please click on the arrow and select the option provided in the drop-down field, which will appear on the screen.
- If you want to use a bullet point list in any of the input fields, please press 'Alt+Enter'.
- **If you want to paste and copy information in the document, please select the content of the cell and not the cell itself.**

Application forms with error messages or with uncompleted sections will automatically be declared ineligible.

Checklist for submission

Please make sure that you have fulfilled the requirements listed below before submitting the documents.

- 1. The electronic version of the completed application form is submitted via e-mail to application@interreg4c.eu by the end date of the call at the latest.
- 2. The paper version of the completed application form and the relevant annexes (co-financing statements) is sent to the JTS in Lille by the end date of the call at the latest (proof of the sending date has to be provided).
- 3. The electronic and paper versions of the application are identical.
- 4. All documents are in the working language of the programme (English).
- 5. The paper version includes the completed application form and the relevant annexes (co-financing statements) in one single package/envelope.
- 6. The paper version is not bound in order to ease later photocopying for the JTS.
- 7. Co-financing statements in original or fax version are submitted for all partners including the Lead partner. They are dated and signed by hand. The standard form presented in the programme manual has been used and besides the fields to be filled no amendments to the text have been made. The information in the fields to be filled (acronym, title, name of institution, partner no and co-financing amount) corresponds exactly to the information provided in the application form.
- 8. All partners participating in the operation, i.e. including partners from third countries, are listed in section 5 of the application form with their institution's name in original and English languages.
- 9. The application form is dated and signed by hand by a duly authorised representative of the Lead Partner.
- 10. The application form is dated and if available stamped.
- 11. The applicant has verified the compliance of the application with the eligibility criteria of the INTERREG IVC programme described in the programme manual.
- 12. The applicant has verified that all fields have been filled in and no error messages appear.
- 13. The Lead Applicant is involved either as partner or as lead partner in a maximum of **five** applications submitted in the same call.

Section 1: Project Summary

1.1 Acronym:

DeltaNet

1.2 Title of the project:

Network of European Delta Regions - Sustainable Delta Governance

1.3 Type of intervention:

Regional Initiative Project

1.4 Duration

Please indicate when the operation will start and finalise its activities. Concerning the start date, the following elements should be taken into consideration. Projects should be ready to start their implementation as soon as possible after the decision of the IVC Monitoring Committee and in any case within a maximum of two months from the date of decisions. Decisions on projects are expected to be taken within eight months after the end date of each call. For the recommended duration of projects, please refer to the programme manual.

Start: beginning of 10 2009

Closure: end of 09 2012

TOTAL N° MONTHS: 36

1.5 Sub-theme selected:

Please select the sub-theme the project focuses on. Please note that only one sub-theme can be chosen.

Priority: 2: Environment and risk prevention

Sub-theme: Natural and technological risks (including climate change)

1.6 Brief summary of the project

Please provide a brief summary of the project's background, objectives, partnership, main activities and expected outputs and results. It is strongly advised that this field is filled in after the entire Application Form has been completed. Should the project be approved, this summary will be published on the programme's website. Thus, it should be clear, self-explanatory and without references to other parts of the Application Form or to other documents.

Why?

The delta and estuaries regions in Europe encounter similar characteristics, problems and opportunities as they have to deal with a very dynamic development of urbanisation, economic activities, infrastructure, natural and technological risks. The high spatial and economic demands are threatening a sustainable development and maintenance of the special character of Delta regions. These areas are often characterized by both very important ecological values (river basin and coastal zone), and concentrations of urban and economic activities. Regional policy measures are often inefficient and ineffective as an integrated and sustainable approach is often absent. That is why nine Delta areas throughout Europe decided to start a cooperation to exchange experiences and improve their regional policy instruments, methods and approaches.

Who?

DeltaNet is a network of 9 European Deltas bringing together 9 partners from 7 EU Member States well spread over Europe:

the delta areas of the rivers Rhine, Meuse and Scheldt (BE/NL), Ebre (ES), Tagus (PT), Danube (RO), Vistula (PL), Elbe (DE), Minho (ES/PT), Llobregat (ES) and Severn (UK). The Delta regions have been preparing this cooperation for 2.5 years as they are all struggling with a sustainable and integrated policy in these sensitive areas.

What?

The overall objective of DeltaNet is to improve the effectiveness of regional development policies in Delta Regions through interregional cooperation in the areas of environmental risk prevention, specifically through the development of appropriate coordinated spatial planning measures in geographically sensitive areas. Sub-objectives are to enable a(n):

1. Better integrated Delta approach (a sustainable economic and ecologic use of port areas)
2. Improved flood risk & sediment management.
3. Improved environment (wetland restoration).
4. Higher Delta awareness (public participation and communication to public).

5. Better coordinated Delta policy

... 6. As a result of these, a sustainable network of Delta regions.

For each of the above mentioned 5 topics there will be an expert workshop, a conference and a follow-up workshop. This will result in an overview of good practices, policy recommendations for EU, Delta regions in general and the specific involved Delta regions. Also a work plan for each involved Delta region will be developed to follow-up on the implementation of the policy recommendations.

The involved partners aim for good examples, policy instruments and arguments to convince the politicians and make people aware of the need for a coordinated Delta policy. Working together on common challenges provides partners with innovative insights in how to balance the different demands in regional policy. The innovative approach is furthermore that Delta regions are generally not yet considered as geographical entities with particular problems and solutions and are not yet cooperating.

1.8 Project budget (in EUR) (based on the partner budget described in Section 5)

	Amount
ERDF Funding	913.113,09 €
National Public Co-financing	243.029,89 €
Total budget eligible to ERDF	1.156.142,98 €
Norwegian Funding	0,00 €
Norwegian Co-financing	0,00 €
Total Budget Norway	0,00 €
INTERREG IVC BUDGET	1.156.142,98 €
Other funding	0,00 €
TOTAL BUDGET	1.156.142,98 €

1.9 Lead Partner confirmation

By signing the Application Form the Lead Partner hereby confirms that

- the project neither in whole nor in part has or will receive any other complementary EU funding (except for the funding indicated in this Application form) during the whole duration of the project.
- the project is in line with the relevant EU and national legislation and policies of the countries involved.
- all partners in the partnership receiving funding from the INTERREG IVC programme (ERDF or Norwegian funding) fulfil the criterion of a public body or a body governed by public law as defined in the Programme Manual.
- all partners described in Section 5 of the Application Form are committed to taking part in the projects' activities
- the information is accurate and true to the best knowledge of the Lead Partner

Signature of the Lead Partner	Official stamp of the Lead Partner's institution if available
Name of the signatory	Mr. Marc De Buck
Title of the signatory	member Provincial Executive of the Province of East Flanders
Lead Partner's institution	Provincie Oost-Vlaanderen
Date of signature	26 January 2009

Section 2: Detailed Description of the Project

2.1 Rationale

2.1.1 Brief history of the project

Please describe how the project idea and partnership was developed and how the partners were involved in developing the project proposal.

The start

Delta regions in Europe have similar characteristics and challenges. Therefore the Province of East Flanders started in 2004 a partner search. Partners showed interest as they are in need of best practices that 1) can be used to convince people/politicians for a more integrated approach, 2) offer ideas for better solutions in sustainable development. The partners want to improve their Delta regional development policies through exchanging best practices and defining and implementing policy recommendations.

Partners involvement

The project idea has been developed jointly during 7 meetings throughout Europe in the various Delta regions. In between the meetings ideas have been communicated, developed, matrixes were disseminated and the proposal has been jointly developed. Discussions have been held with 12 Delta regions. In the end 9 Delta regions agreed on similar topics, objectives and budget.

The other three Delta regions could not be partners because of various reasons but are interested to remain involved (Oder, Thames and Loire). The Lead Partner, Province of East Flanders, has been coordinating the preparation process. The partners organised the international meetings and study visits at their own premises and contributed to the proposal.

The meetings in detail

- 7-8 February 2005 Gdansk (PL): Kick-off with 5 Delta regions
- 18 November 2005 London (UK): 6 Delta regions presented their organisation, main activities, concerns and expectations.
- 17-19 May 2006 El Part de Llobregat (ES): 8 Delta regions elaborated jointly the themes and activities of DeltaNet. Partners indicated their needs and expectations, their desired benefits of the cooperation, and the organisation and management were discussed.

- 12-13 December 2006 Bergen op Zoom (BE/NL): 9 Delta regions developed a matrix of interest which was used to define the chosen issues, time path and different roles of the partners in this Interreg IVC proposal.

- 2007 frequent email and phone contact with all partners to finalise the proposal
- November 2007 Bristol (UK): meeting of several Delta regions, linked to 'Estuariales' and 'Severn Estuary partnership meeting'.
- January 2008: Proposal is considered ineligible due to missing document
- 27-28 October 2008 Lille (FR): the 9 Delta regions meet to fine tune ideas.

IIIC – IVC

The partners wanted to submit at the last IIIC call, which never was launched. At the first IVC call the proposal was considered ineligible due to a missing document. Despite these delays the partners remained interested and committed to DeltaNet! Now the partners are really looking forward to start DeltaNet.

2.1.2 Problem description / issue addressed

Please describe what problem(s) and/or issue(s) the project will address. Explain the background of the problem(s) / issue(s) and their relevance to the partnership and the INTERREG IVC programme. Please justify the choice of the selected sub-theme.

Overall similar geographical problem:

DeltaNet partners joined because they all encounter that the current regional development policies are not sufficiently effective for the dynamic and complex Delta regions. Delta regions are geographical sensitive areas as their sustainable development is constantly endangered through the many natural/environmental and economic demands. Some natural delta areas tend to be densely urbanised regions, often related to port development using the river delta as an important gateway (Rhine-Scheldt, Tagus, Elbe, Llobregat and Severn). Other delta regions consist of more rural, agricultural use of the high fertile riverside land (Ebre, Donau, Vistula and Minho).

During the project preparation 20 problems were identified for the Delta regions. The partners selected jointly the 5 most important problems:

Specific problems:

1. Unbalanced Delta approach

Characteristic of the Delta regions is the competition between the highly important economic developments for the ports and the specific ecologic value of the Delta areas. These two aspects (economy & ecology) are competing and often result in an unbalanced Delta development. The Taag Delta has good practice with solving issues concerning the harbour and its surrounding (compensation policy).

2. Insufficient flood and sediment management

Delta regions are sensible to flood risk, not only from the sea but also from the river. Furthermore sediment management is a problem in the Delta regions, either through an accumulation of sand in the river mouth (with consequences for the access of ships and some migratory fish species such as salmon, shad or bass) or a lack of sediments arriving in the delta (due to sediment retention by dams) which leads to subsidence and increasing flood risk. The Ebre and Elbe Delta have good practice in sediment management.

3. Deteriorating environment

The original habitats, wetlands and its biodiversity are endangered because of the intensive use of the Delta regions. This causes high risks also because of the climate change. The Danube Delta has good practice with 15000 ha ecologically restored area and thus decreasing environmental risks.

4. Lack of Delta awareness

The current regional policies are not recognising sufficiently the specific characteristics of Delta regions. Politicians, stakeholders and the public in general are having a low awareness of the special character, potentials and challenges of the Delta areas. There is a lack of clear communication and public participation. Material such as maps and an atlas to show the characteristics of Delta regions and training/educational material on the environmentally special areas are absent. A higher awareness of these areas will stimulate the recognition of the Delta regions. The Vistula Delta has for example good practice with environmental education.

5. Lack of sustainable coordinated Delta Policy

The current regional policies are not recognising sufficiently the need for a coordinated approach, including all stakeholders. Showing good practices will help the Delta regions to convince their politicians and stakeholders that a well coordinated policy is needed to have a balanced and sustainable development of the Delta regions. An integrated and cross-border vision (ProSes 2010) has for example been developed for the Rhine-Scheldt Delta.

The partners joined together as they are all searching for ways to improve the regional policies in the above five fields. The involved partners lack examples, instruments and arguments to convince the politicians and people of an integrated approach. Working together on current common challenges provides partners with innovative insights in how to balance the different demands in regional policy and achieve improved policy instruments.

2.1.3 Objectives of the project

Please describe the overall objective and sub-objectives of the project.

Overall objective:

The overall objective of DeltaNet is to improve the effectiveness of regional development policies in Delta regions through interregional cooperation in the areas of environmental risk prevention, specifically through the development of appropriate coordinated spatial planning measures in geographically sensitive areas.

The involved partners aim for good examples, instruments and arguments to convince the politicians and make people aware of an integrated approach and improvement of the regional approaches on 1) integrated Delta approach, 2) flood & sediment management, 3) environmental healthy Deltas, 4) sustainable Delta awareness and 5) integrated sustainable policy. Working together on common challenges provides partners with innovative insights in how to balance the different demands in regional policy.

Thematic sub-objectives are to enable a(n):

1. Better integrated Delta approach (a sustainable economic and ecologic use of port areas)

2. Improved flood risks & sediment management

3. Improved environment (wetland restoration)

4. Higher Delta awareness (public participation and communication to public)

5. Better coordinated Delta policy (involving all stakeholders, creating partnerships)

6. Sustainable network of Delta regions.

These sub-objectives will be achieved through exchanging good practices, developing a practical document with policy recommendations, a work plan to implement the policy recommendations and follow-up workshops to monitor the work plan, summarising:

A) Meetings at workshops, conferences and at other events

B) Producing good practice guides and policy recommendations and work plans

C) Disseminating results through brochures, newsletters, website and inviting politicians and other regions.

The objective is to improve the effectiveness of policy instruments of the sensitive Delta regions. The aim is to directly influence the policy instruments of the involved Delta regions: learning, involving and improving. Furthermore it is the objective to influence other Delta regions and other relevant policy levels indirectly by disseminating the results and inviting them to the conferences and involve them where possible.

The longer term ambitions of the DeltaNet partners are:

- To develop and implement an improved European, national and regional policy agenda for the sustainable management of Delta regions.

- To increase the competitive position of Delta regions in the world. Better Delta policy will help them to develop clear visions with a clear focus that can attract economic and innovative developments.

- To create a sustainable network that will enable the Delta regions to cooperate and stimulate each other where possible and develop together innovative approaches.

2.1.4 Expected outputs and results of the project

a) Please describe the outputs and results the project intends to produce. For further information, please refer to the Programme Manual.

(**Outputs** are tangible deliverables and visible outcomes or products of the project. They directly result from the activities carried out in the project. Output indicators are typically measured in concrete units such as number of seminars, study visits, conferences, participants, publications, good practices identified, policies addressed. **Results** are direct and immediate effects resulting from the project and from the production of the outputs. Compared to outputs, results imply a qualitative value. They should be also measured in concrete units such as the number of staff with increased capacity, the number of good practices successfully transferred, the number of policies improved.)

Outputs: A) Meet

1) In total 22 interregional workshops and study tours where experts exchange good practices and discuss methodologies, tools and instruments. There will be at least 3 per theme, one before, during and after the conference (to monitor the implementation of the policy recommendations and the work plans, discuss potentials and provide advice to each other). There are also 7 meetings with the theme responsible partners to coordinate the activities between the themes. There will be a report of each workshop.

2) 5 thematic conferences to present, discuss and disseminate the results of the workshop and the policy recommendations. These conferences are open for all people interested throughout Europe. After the conference the participants receive a conference report (1 per theme and 1 for whole project).

B) Products

3) 6 practical documents (1 per theme & 1 overall) consisting of good practices and policy recommendations for local, regional, national and EU policy levels.

4) 28 work plans (1 per partner per theme + 1 overall) to monitor the improvement of the policies, instruments and tools. Partners will provide feedback to each others work plan.

5) 10 good practices identified (2 per theme) and 27 regional policies and instruments addressed (1 per theme per theme partner)

C) Disseminate

6) Each region will actively involve people and disseminate information of DeltaNet within their own region and towards other regions, through: 2 brochures (1 at start and end with results, 200 copies per partner), 7 newsletters (every 6 months, 100 copies per partner), 112 press releases (2 per theme & of whole project in 8 languages) and 1 interactive website. The partners participate in at least 27 other events (ca 3 per partner) and there will be 5 dissemination events (60 participants per event).

7) A Steering Committee to ensure a smooth running project, 1 project guideline will be developed for the partners & at the end the project will be evaluated.

Results: A&B) Capacity building & awareness

1) 124 people with increased capacity, 2) 9 regional policies and instruments improved,

3) 29 local, regional, national, European political policymakers involved (present at conference)

4) 5 of 20 Delta problems will be solved with higher quality and more integrated policies, instruments and tools: (1) better integrated Delta approach, (2) improved flood risk & sediment management, (3) environment, (4) Delta awareness and (5) coordinated Delta policy.

5) A sustainable learning policy network of European delta regions is set up

6) More recognition for Delta regions is achieved

C) Disseminated

7) 112 articles in press and media & 25 visits on website per month

8) Dissemination of copies of reports: 425 conference reports, 299 workshop reports, 278 good practice & policy recommendations, 278 work plans (to participants + 25 per theme extra)

b) Please explain the innovative character of the expected results. In particular, for projects deriving from past INTERREG experiences (follow-up projects), please clarify the added-value of these results compared to the achievements of the previous experience.

DeltaNet is innovative because:

- 1) DeltaNet is a unique partnership in Europe, which has not yet been established before. The partnership has been established on the basis of similar problems and similar geographical areas.
- 2) DeltaNet is dealing with similar sensitive areas – the Delta regions - which has not been dealt with before. Delta regions are not yet considered as specific areas with specific problems. The experiences/good practices will constitute itself as instruments of great value for the resolution of existing specific problems in the areas of estuary and for qualification of the entities involved with tools and instruments that enable to raise the opportunities that these areas offer in their territorial contexts of insertion.

3) DeltaNet is offering to spread Europe wide a more integrated approach towards Delta regions. The innovation of the project binds itself with the possibility of the establishment of an international network for the exchange of experiences and good practices in the themes that constitute the thematic scope of the same.

4) DeltaNet's approach focuses on governance influencing through best practices from various points of view, as integrated Delta approach, flood risk & sediment management, environmental healthy Delta's, Delta awareness and sustainable coordinated delta policy. Achieving recognition for these areas in Europe is innovative.

2.1.5 Intensity of cooperation

Please describe the level of intensity of cooperation that you intend to achieve within your project (see chapter 2.1.1 of the programme manual)

DeltaNet intends to achieve a basic level of intensity of cooperation. In the first place the project's objective is to exchange and disseminate experience and enable improvement of the current policies, instruments and tools concerning Delta regions.

During the DeltaNet project there will be:

- Good practices guides with policy recommendations for 5 themes and 1 for Delta regions in general
- Work plans for each partner in each theme on the implementation of the policy recommendations
- Workshops and study visits to exchange and discuss and develop
- Thematic conferences for a wide audience
- Websites, newsletters, brochures and press releases.

DeltaNet does not foresee during the project a pilot or a complete transfer between partners of good practices. However, a follow-up of DeltaNet might include this.

DeltaNet is created to enable partners to optimise the current situation in their Delta regions through comparing their situations and through advising each other on the possibilities for improving their Delta region policies and instruments. It is important for the DeltaNet project to disseminate the good practices useful to all partners and to develop regional policy recommendations feeding into national and European policy documents.

DeltaNet has already developed a strong involvement of all partners during the preparation period. Cooperation with a solid basic level of intensity will result in new knowledge and skills and improvement of regional and local policies and strategies and a better awareness of the possibilities and challenges of the sensitive Delta areas.

Each DeltaNet partner evenmore represents, or plays an active rol in a regional network of public, semi-public and private partners with different sectoral interests in their (cross-border) delta region.

2.1.6 Approach and methodology

Please describe the approach and the methodology (e.g. sequence, combination and interrelation between the activities; logic behind the different Components) proposed to achieve the project's objectives and to produce the intended outputs and results.

The project consists of 3 Components (C):

C1: Management and Coordination.

C2: Communication and Dissemination.

Component 1 and 2 are coordinating components. The managers of C1 and C2 have to ensure that DeltaNet is a well organised and well known successful project with high quality, within the budget and the time plan. The first and last half year, Q1 and Q7, will be mainly to start up and finalise the project (mostly C1 and C2). The main activities for the themes will be dealt with from Q2 until Q6 (C1, C2 and C3).

C3: Exchange and policy improvement. This is the 'content based' component. The thematic workshops and conferences are organised under component 3, just as the production of the thematic documents. The dissemination of the documents, however, falls under Component 2.

- Each half year a new theme will start.

This structure enables DeltaNet to deal with 5 of the 20 identified problems. The theme will start with a thematic workshop with experts from the involved partners. This workshop will serve to exchange good practices and prepare the conference. When they meet for the conference they will elaborate in a second workshop the work plan. The third workshop will be held at the next conference to monitor the implementation of the work plans. For each theme there are at least three thematic workshops planned.

- There will be an overlapping sequence between the themes.

Around the conference for e.g. theme 1 (integrated Delta approach) there will also be the start up interregional thematic workshop of the second theme (flood risk & sediment management). This 'overlap' ensures that a theme is thoroughly dealt with. Through the follow-up workshop and the monitoring an optimal impact is to be expected from the exchange and policy recommendations.

- Optimal use of the conferences.

Around the conferences there will be the Steering Committee meetings, dissemination event, coordination meetings between themes, thematic workshops of the current, previous and next theme and study visits. This will minimise travel costs as much as possible. A good preparation is therefore essential.

- The order of the themes.

Integrated Delta approach is focussed on a balanced development and will clearly show the difficulty of balancing economic and environmental development. After this theme which shows the need for better environment & risk prevention there are two themes who go deeper into the environment & risk prevention (flood risk & sediment management and environment). After a deeper analysis creating awareness and public participation will be dealt with to see how Delta regions can improve this in the field of a sustainable development. Finally the last theme is bringing the four themes together and focuses on the integrated Delta policy.

2.1.7 Components of the project

Activities have to be organised logically into a certain number of components. The description of these components is provided in section 3 of the application form. For further information on the components, please refer to the programme manual.

Acronym: DeltaNet

Component 'Preparation Activities'	Title	Preparation activities
	Responsible partner	Province of East Flanders
Component 1	Title	Management and coordination
	Responsible partner	Province of East Flanders
	Planned results	A well managed project reaching its objectives, without serious conflict between the partners, without irregularities and with smooth reporting to the programme
Component 2	Title	Communication and dissemination
	Responsible partner	Metropolitan Area of Lisbon
	Planned results	Good internal and external communication and dissemination of outcomes and results of the project.
Component 3	Title	Exchange of experiences dedicated to the identification and analysis of good practices
	Responsible partner	Province of East Flanders
	Planned results	Accumulation and improvement of knowledge and experience on sustainable governance of delta regions in Europe, through workshops and conferences on 5 themes, best practice manual, policy recommendations and new
Component 4	Title	
	Responsible partner	
	Planned results	
Component 5	Title	
	Responsible partner	
	Planned results	

2.1.8 Durability of the project results

Please describe how the durability of the project's achievements will be ensured. How, when and by whom will the outputs be used and how will they be maintained after the end of the project? How will the results/impacts of the project be sustained?

The results will be sustained by the following means:

1. Delta regions should become recognisable and a sustainable Network.

The DeltaNet project is set up with a long term perspective to enable the Delta regions to improve their sustainable regional development. That means that the activities and results are not only durable for the participating Delta regions but also for other Delta regions. During the project the partners will discuss the possibilities for establishing a permanent network after the project has been finished.

2. Useable results through good practice guides, work plans and policy recommendations.

Each partner will be able to use the benefits of the good practices and policy recommendations in their Delta region. All reports and newsletters will be disseminated to a broad public of local and regional authorities.

3. Clear policy recommendations and work plans for the future

At each conference and the workshop will be decided how to proceed with the results and who to involve. The durability and sustainability of the project's results will grow with the successful integration of the results, products and recommendations in the regional policy of the participating delta regions.

4. Now only first 5 topics, many more to go

The first five most urgent problems were chosen which are relevant to basically all partners. There are also other issues that could not be covered by this project that still need to be dealt with, such as fishery, biodiversity, tourism, preservation of local traditions.

5. People with increased knowledge will be better ensuring sustainable Delta regions

For each theme experts from the participating regions will be involved. This means that a large group of people will be involved in DeltaNet, ensuring thus that the increased knowledge will be spread.

6. Durable results through awareness and action at relevant policy levels

Policy recommendations to EU and other policy levels will bring the findings, lessons learnt and recommended methods to the convenient policy level and to a broader range of European deltas than the involved regions of the DeltaNet project.

7. The website as source of information

On the common website these outcomes will be kept available also after the closure of the project period by the lead partner. Also after the project period these links may remain, while each partner can keep his web page up to date.

8. Broadening the DeltaNet

The products are not only focussed on the partners but also on the use for other Delta regions. Furthermore contacts will be sought and maintained with other Delta regions to ensure the exchange of knowledge.

2.2 Policy context

2.2.1 Contribution to the programme's objectives and to the Lisbon and Gothenburg agendas

Please describe how the project will help to achieve the objectives of the INTERREG IVC programme and contribute to the Lisbon and Gothenburg agendas. What added value will interregional cooperation bring in this context?

The overall objective of DeltaNet contributes straight to the objectives of the INTERREG IVC programme (IVC): to improve the effectiveness of regional development policies in Delta regions through interregional cooperation in the area of environmental risk prevention. DeltaNet is not only developing appropriate coordinated spatial planning measures in geographically sensitive areas (theme 5) but is also contributing to awareness raising tools and strategies on natural and technological risks and reducing floods (theme 2&4). Furthermore integrated, sustainable and participatory approaches to waters (theme 2&4) and developing ecosystems based approach are aimed for in DeltaNet (theme 3). Lastly DeltaNet also contributes to environmental sustainable strategies in transport sector (theme 1).

All DeltaNet activities are of purely interregional character. The project is expected to have a strong local spin-off, but the INTERREG funding is being used for the interregional activities.

The partnership aims to position Delta regions at regional, national and European level. Without a European partnership this could never be achieved. The good practice guides and policy recommendations will enable other regions to profit from and build on the results of DeltaNet. Although the partners are strongly committed to DeltaNet it has not yet been possible to start up this partnership without INTERREG funding.

The project regions less experienced on one sub-theme will be matched to more experienced regions. DeltaNet will create added value in an innovative way because there is no Delta regions network in Europe to share knowledge and partners will learn from good practices and regional and local policies will be improved. Moreover, the experiences and know-how generated through the project will become an added value at the European level through the resulting policy recommendations. Regional competitiveness benefits also from environmental quality.

Lisbon & Gothenburg Agenda

DeltaNet tackles an issue that is closely related to both the Lisbon and Gothenburg agenda. The Lisbon strategy aims to make the EU 'the most competitive and dynamic knowledge-based economy in the world, capable of sustainable economic growth'. The Gothenburg resolution sets out as the prerequisite and cornerstone of EU the concept of sustainable development, which must be taken into account by the central and regional governments, as an absolute ethical priority. Within the issue 'Sustainable Delta Governance' an integrated policy is dealt with in which both environmental, economic and social sustainability matter. Especially Delta regions show that economic, environmental and social policies should be developed in a mutually reinforcing way. The sensitive Delta regions with a strong ecological coherence often contain highly economic growths of ports, urbanisation and infrastructure or have at least the opportunities.

Nevertheless every delta and estuary has to handle the accumulation of water pollution up stream caused in the catchments area, and the loss of biodiversity. Delta regions are also the areas where the consequences of climate change will accumulate: rising sea level and, depending on the regional effects of climate change, in- or decreasing river flows. The economic developments together with the environmental and safety issues ask for innovative solutions and a successful integrated governance and policy is needed. In communication and participation the social sustainability of delta government is to be found.

Other relevant policies

The DeltaNet project can furthermore be considered to be closely related to ESPO (European SeaPorts Organisation), Water Framework Directive, Marine Environment Strategy and EU Ports Policy. Within the project also previous experiences of INTERREG projects will be taken into account, as New!Delta and CoPraNet.

2.2.2 Involvement of the relevant policy makers

For the Capitalisation Projects, please explain how, in each participating region, the relevant bodies responsible for the Operational Programme will be involved? These explanations will be complementary to the information provided in section 5 ('Relevance of the partner'). For further information, please refer to the programme manual.

Acronym: DeltaNet

2.2.3 Consistency of the project with EU horizontal policies

a) Equal opportunities

Please state if the project will:

- have its main focus on equal opportunities
 be positive in terms of equal opportunities
 be neutral in terms of equal opportunities

b) Environmental sustainability

Please state if the project will:

- have its main focus on environmental sustainability
 be positive in terms of environmental sustainability
 be neutral in terms of environmental sustainability

c) Consistency of the project's theme with EU horizontal policies

Please explain how the theme tackled by your project will address directly or indirectly each of the two EU horizontal policies.

Equal opportunities

The project is not having equal opportunities as a focus but there could be a positive effect on involvement of minorities. A small majority of the contact persons of the project are women: 5 out of 9 partners. The project manager is female. As in the new member states a majority of women is working at the public administration, it is to be expected that from PL and RO a majority of women is participating. In most other European countries there is no majority of women at the public administration so the positive effect is considered to be rather small. Therefore has been indicated that the project will be neutral.

Environmental sustainability

DeltaNet has its main focus on environmental sustainability. The project is about sustainable delta governance, in order to develop appropriate coordinated regional planning measures in these geographically sensitive areas. The focus is on how to provide the best balance between ecological and economical aims in delta regions.

DeltaNet is dealing directly with three of the seven key challenges identified by the renewed EU Sustainable Development Strategy of June 2006: 1) Climate change and clean energy, 2) Sustainable transport and 3) Conservation and management of natural resources.

Furthermore DeltaNet is contributing directly to the Marine Environment Strategy which has been adopted in June 2008. Its objective is to protect more effectively the marine environment across Europe. Each Member State is required to develop strategies for their marine waters. The marine strategies must contain a detailed assessment of the state of the environment, a definition of "good environmental status" at regional level and the establishment of clear environmental targets and monitoring programmes. Each Member State must draw up a programme of cost-effective measures and impact assessment including a cost-benefit analysis. DeltaNet will include these new requirements in their project.

DeltaNet will also deal with the requirements of the Water Framework Directive (WFD) which requires surface freshwater and ground water bodies - such as estuaries, and Delta regions - to be ecologically sound by 2015 and develop River Basin Management Plans. So far many regions have encountered problems in meeting the WFD targets of having an integrated River Basin Management Plan and having an integrated approach in flood & sediment management planning and development. DeltaNet will compare for the DeltaNet regions what solutions are possible and how problems can be encountered in an effective way.

Lastly the DeltaNet will clearly contribute to the EU Ports Policy (approved October 2007) as one of the core themes of the policy is environmental guidelines for ports. The first theme of DeltaNet is focussed on this.

d) Consistency of the project's implementation with EU horizontal policies

Please explain how the day-to-day implementation of your project may address equal opportunities and how it may impact the environment.

Equal opportunities

The DeltaNet project's day-to-day implementation will be slightly positive in terms of equal opportunities. A majority of the DeltaNet team members is female. The involvement of women and minorities will be encouraged. However, it is not a focus of the project.

Environmental sustainability

Day-to-day implementation

All five themes within the DeltaNet project are dealing with environmental sustainability. The first 2 themes are Integrated Delta approach and Flood & sediment management. Exchange of knowledge on these themes will have both a focus on technical and on environmental aspects and consequences. The third theme is totally focused on Environmental healthy Deltas. Also the two other themes, Delta awareness and Sustainable Coordinated Delta policy, will study methods to deal with delta government and the impact on the environment.

Because the main objective is Sustainable Governance, the impact on the environment will always be kept in sight. All workshops and conferences are dealing with how to improve the regional policies in the field of sustainable Delta development. Partners will exchange how they are achieving the objectives of the Water Framework Directive, the Marine Environment Strategy and the Sustainable Development Strategy. What problems are they encountering and what solutions can they suggest? Solutions will be sought to avoid an increase or shortage of sediments, there will be dealt with good practices in sustainable port development.

Impact on environment

The impact on environment will mostly be in the long term as the improved policy measures and tools are the first objective of the project. It is however to be expected that the DeltaNet activities will have an impact as DeltaNet is aiming to improve policies and tools concerning sustainable development.

To be specific:

The good practice of restoring 15 000 ha wetlands in Romania will be shared with partners and discussed what can be transferred to the other partners. Also for the other good practices a transfer will be discussed, such as for the Proses2010 approach (integrated regional development plan of the Scheldt estuary), and the solutions for the sediments in the Elbe which were endangering the wildlife and the entrance for ships to the harbour.

Furthermore the thematic partners will study each others area and jointly advise on how to improve the development in each Delta in a sustainable way.

The aim is to have a better integrated Delta approach, a better management of sediments, better wetland restoration, a better awareness of the special characteristics of the Delta regions and a better coordinated Delta policy.

2.3 Management and coordination

2.3.1 Coordination

a) Will coordination be sub-contracted?

no

b) Details of the coordinator

Name	Verbeeck Maja		
Institution	Province of East Flanders		
Address	Gouvernementstraat 1		
Postal code	9000		
Town	Ghent		
Country	BE		
Phone (office)	+32 (0)9 267 86 83	(mobile)	+31 (0)6 183 032 79
Fax	+32 (0)9 267 86 98		
Email	maja.verbeeck@oost-vlaanderen.be		

c) Management and coordination

Please describe the main coordination tasks and the way the day-to-day management of the project will be organised.

The coordinator is from the province of East Flanders, is experienced in European project management and is familiar with the Rhine-Scheldt Delta. The province of East Flanders is one of the two provinces filling the chairmanship of the Rhine-Scheldt Delta Steering Committee, which is a cross border (BE - NL) cooperative organisation with no legal body.

In this way the coordinator connects the thematic interests and driving force to mobilise the partners and the financial and administrative qualities of both the province of East Flanders and the Rhine-Scheldt Delta. The coordinator has been involved from the start and knows all partners well.

The Lead Partner takes on the responsibility for management, communication, implementation and coordination of activities among the involved partners.

Coordination tasks of the day-to-day management are:

- The division of tasks among the partners, to ensure that these tasks are subsequently fulfilled in compliance with the Application Form, Subsidy Contract and Partnership Agreement.
- To ensure an efficient internal management: managing and controlling communication within the partnership, collecting and circulating information, to assure a quick reaction to problems and needs.
- To make certain that the project reports go timely and correctly to the JTS.

Organisation of the day-to-day management:

- The project manager will keep day-to-day contacts with the partners, especially with the partners chairing a theme of C3 and C2, to monitor progress of the activities.

- The project manager prepares the plenary meetings of the Steering Committee. The meeting of all partners will periodically monitor and review all activities and results and decide necessary changes in project structures or procedures.

- The lead partner will deal with day-to-day problems which may arise (late delivery of thematic outputs, late submission of financial statements, ...). In urgent cases, the lead partner may take the necessary actions after informing the partners and setting a deadline for response.

- The lead partner will be the main contact for the INTERREG IVC secretariat.

- The lead partner will maintain frequent contact with all partners on progress and optimising possibilities of the project (informing them on interesting events, relevant developments, investigate potentials for follow-up of DeltaNet and making EU aware of the initiative).

2.3.2 Financial management

a) Will financial management be sub-contracted?

b) Details of the Financial Manager

Name	De Steur Peter		
Institution	Province of East Flanders		
Address	Gouvernementstraat 1		
Postal code	9000		
Town	Ghent		
Country	BE		
Phone (office)	+32 (0)9 267 86 85	(mobile)	<input type="text"/>
Fax	+32 (0)9 267 86 98		
Email	peter.de.steur@oost-vlaanderen.be		

c) Financial management

Please describe the main tasks of the financial manager and the way the day-to-day financial management of the project will be organised.

The financial manager is from the Province of East Flanders. He is familiar with the INTERREG procedures such as accounting rules, international transactions, EU and national legislation for the management of ERDF, public procurement and financial control.

Main tasks of the financial manager:

- To ensure an efficient internal control system.
- To request and receive payments of programme funding.
- To transfer programme funding to the partners without delay in compliance with the amounts reported in the progress report.

The financial manager is responsible for the financial reports towards the JTS, the contracting, accounting, and the financing of the project (both INTERREG and national). The financial manager has been involved from the start of the project.

Organisation of the day-to-day management:

The financial manager will work in close cooperation with the project manager and the partners in order to ensure a timely delivery of the financial reports and a sound financial management of the project. He will supervise the partners in their duties such as identifying the certifying body for the first level control, collecting the declarations of expenditures, accounting and contribution to the 6-monthly financial reports.

The financial manager will follow the rhythm of the INTERREG payments also towards the partners. They will be reimbursed after the financial manager has received the INTERREG funding.

Responsibility of the individual partners

Each EU project partner has to define a certifying body for first level control. The individual partners are responsible for the regional activities and their contribution to transnational results. One coordinator per country will be assigned to support the lead partner in collecting the relevant data, e.g. the declarations of expenditure and the progress reports. After project approval an additional procedure to audit the overall project progress and finances will be defined. Declarations or expenditures will be generated during the project at regular 6-monthly intervals. The guidelines which will be developed at the start should facilitate the partners in preparing their invoices.

2.3.3 Strategic level

Please describe the decision-making, monitoring and evaluation structure of the project, including the composition of the steering group, its competences and procedures.

Decision-making structure, monitoring & evaluation

The Steering Committee (SC) is the decision-making and monitoring body of DeltaNet, consists of representatives from all the partners and will meet twice a year. These meetings will be held in different locations, 5 of the 7 meetings coincide with the thematic conferences. The Steering Committee meetings are prepared and chaired by the lead partner. Decisions are consensus-based. In case decisions need to be made outside the Steering Committee meetings a written procedure will be followed.

The task of the Steering Committee is the monitoring of the project and provision of guidance regarding its implementation and consists of reviewing and approving:

- Rules of procedures for Steering Committee.
- Guidelines towards partners & Evaluation report.
- Overall reports & Progress reports.
- Budget and time plan.

Lead partner

The lead partner will deal with day-to-day problems which may arise (late delivery of thematic outputs, late submission of financial statements, ...). In urgent cases, the lead partner may take the necessary actions after informing the partners and setting a deadline for response. The project manager will include all partners in the information loop when decisions are required, to ensure ongoing and effective day-to-day management.

Responsible theme partners

In order to ensure effective allocation of responsibilities between the partners, each of the 5 themes of C3 will be chaired by a responsible theme partner. This partner will oversee the thematic activities and ensure that the theme is well prepared and implemented. The responsible theme partner will submit plans and ideas to the Lead Partner and Steering Committee for approval. The project manager will ensure close ongoing liaison with the responsible theme partners.

Involvement of regional policy makers

The DeltaNet partners consider it very important to involve regional policy makers. This is important for political commitment towards the improvement of regional policies and possible future activities. Therefore regional policy makers will be:

- Informed of the progress of the project through notes, visits, newsletters and the produced reports
- Invited to the conferences as a speaker.
- Invited to the conferences to meet other policy makers. At the conference a political 'picture' moment will be reserved for the policy makers to meet and exchange.
- Involved in the development of the policy recommendations and work plans, by requesting feedback and advice and by offering the recommendations and work plans.

2.3.4 Roles and tasks among the partners

Please describe if there is any division of roles and tasks among the partners as far as coordination is concerned (e.g. partners responsible for administrative and/or financial tasks, components and/or activities).

A. The **Lead partner** is responsible for the overall coordination as described earlier (2.3.1).

The lead partner is responsible for Component 1 and 3: he coordinates the division of tasks among the partners. Partner 3 (Tagus Delta) is responsible for Component 2: communication & dissemination

B. The **responsible theme partners** are each chairing one of the 5 themes under Component 3. They are responsible for the organisation of the activities and outcomes of their theme and will host one of the 5 conferences. Their tasks are:

- Organise workshops, study visits and conference on the theme
- Coordinate best practice guide, policy recommendations, conference report, and work plan.
- Coordinate exchange and implementation
- Ensure that the partners are well involved and contribute as requested
- Maintain contact with the Lead partner and the Steering Committee on the progress
- Inform the Lead partner timely in case of problems

C. The **theme partners** are participating in a theme. Each partner is participating in at least three themes. They develop together the theme under the guidance of the responsible theme partner. For each theme a group of ca 5-6 partners assists the chair partner in both preparation and reporting. Their tasks are to:

- Contribute to workshops and conferences
- Contribute to reports
- Advise other partners on how to deal with the topic in their Delta region
- Implement work plan and policy recommendations
- Actively involve people from their Delta region & disseminate results for a durable result

D. The **partners** who are not involved in a theme as a theme partner will be participating in the conferences and are interested in the results of the theme. The conferences are always attended by all partners. In this way all partners will be involved in all themes.

E. Lastly people or organisations who are not involved as a partner but are **interested** in the conferences are very welcome to join the conference and to exchange information.

F. **Task division of responsible theme partner, timing of conference and involved theme partners**

1. Integrated Delta approach: TAGUS, 1st h 2010, Elbe, Llobregat, Severn, Rhine-Scheldt
2. Flood & sediment management : EBRE, 2nd h 2010, Donau, Vistula, Elbe, Minho, Llobregat
3. Environmental healthy Deltas: DONAU, 1st h 2011, Ebre, Vistula, Minho, Llobregat
4. Delta awareness: VISTULA, 2nd h 2011, Ebre, Tagus, Severn, Rhine-Scheldt
5. Sustainable Coordinated Delta policy: RHINE-SCHELDT, 1st h 2012, Tagus, Donau, Elbe, Minho, Severn

As can be seen from the partnership there are 3 partners from Spain involved. This is because 3 different Delta regions are involved. They each represent a different Delta.

Section 3: Components

3.0 Component 'Preparation activities'

Title	Preparation activities	
Total eligible costs	19.526,00 €	
Responsible partner	Province of East Flanders	

Please describe the preparation activities which have taken place

Before 1 January 2007 the partner search started and different meetings with the growing group of partners have been held. In 2007 the DeltaNet partners finished the application for the first call of interreg IV, but unfortunately the application was found ineligible because of one missing document.

Since 1 January 2007 the following activities were effected by the lead partner in close cooperation with all the partners:

- development of the project ideas
- internal communication with partners about the project proposal and partner's agreement: online consultations and phone meetings
- meetings with partners to fine tune project
- completion, adaptation of and check on the application form
- individual consultations with members of the Joint Technical Secretariat
- internal organisation of the lead partner: task divisions management and finance

3.1 Component 1

3.1.1 Component main features

Title	Management and coordination	
Total eligible costs	180.481,00 €	
Responsible partner	Province of East Flanders	
Planned results	A well managed project reaching its objectives, without serious conflict between the partners, without irregularities and with smooth reporting to the programme	
Output indicators	Indicators	Target
	Average number of Steering Committee (SC) meetings organised per year	2

3.1.2 Component general description

Information on the way the management and coordination will be carried out has to be provided in section 2.3 of the Application Form.

3.1.3 Detailed work plan

Please describe as precisely as possible the activities planned per semester as well as the related outputs. Outputs should be quantified and in line with the information provided in sections 2.1.4 and 3.2.1 of the application (if no activities and outputs are planned in a semester, please indicate 'not applicable' in the relevant fields).

3.2 Component 2

3.2.1 Component main features

Title	Communication and dissemination	
Total eligible costs	410.406,00 €	
Responsible partner	Metropolitan Area of Lisbon	
Planned results	Good internal and external communication and dissemination of outcomes and results of the project.	
Output indicators	Indicators	Target
	N° of press releases disseminated	112
	N° of brochures created	2
	N° of copies of brochure disseminated	3600
	N° of newsletters created	7
	N° of copies of newsletters disseminated	6300
	N° of dissemination events organised	5
	N° of other events participated in	27
Possible additional output indicators	Nr of conference reports delivered	6
	Nr of website developed and maintained	1
Result indicators	Indicators	Target
	N° of articles/appearances in press and media	112
	Estimated n° of participants in events	300
	Average n° of visits per month on operation's website	500
Possible additional result indicators	Nr of political policymakers involved	29
	Nr of copies of reports distributed	1160

3.2.2 Component general description

Please describe the content of this component in further detail (e.g. issue tackled, proposed approach, nature of the planned activities). For further information on the components, please refer to the programme manual.

The aim of this Component is to disseminate the project's activities and achievements to the relevant stakeholders inside and outside the project: European policy makers at the local, regional, national and European level.

This component is essential for the sustainability and impact of DeltaNet because:

1. A **communication guideline** will be developed for the DeltaNet partners to ensure a sustainable project with a high impact. The below elements will be elaborated in this guideline. Basically every two months there will be a 'message' to the outside world.
 2. The **dissemination of the partial and final reports** (conference reports, workshop reports, best practices guides, policy recommendations, work plans) will be coordinated. Under Component 3 they will be developed, but under Component 2 they will be disseminated. This will ensure that the documents are not only made but will also be sent to and used by relevant people/organisations.

3. A good involvement of European, national, regional and local policymakers will be coordinated to ensure the future of DeltaNet and also for a clear commitment to the results and improvement. Politicians will be informed about the progress and invited to the conferences.

4. DeltaNet is meant as a **catalyst for developments and investments in each Delta Region**. Next to the DeltaNet activities, each Delta region will disseminate the knowledge and organise local meetings with relevant stakeholders to ensure the development and implementation of useful policy recommendations.

5. Through exchanging knowledge and jointly developing policy recommendations, the special **characteristics and challenges of Delta regions will be more visible**. Under this component contacts will be established with relevant European and international organisations on how to improve the European approach towards Delta Regions (think of policies under 2.2.3).

6. The production of the **newsletter, brochure, press releases** and the maintenance of the **website** will enable the partners to involve & inform relevant stakeholders.

7. **Dissemination events** will ensure that activities & results of DeltaNet are well known & disseminated. For practical reasons external costs for dissemination events and conferences are combined under C2.

8. **Participation in other events** will ensure that activities of DeltaNet are known & will be optimal linked to relevant developments, such as events from Les Esturiales, the annual Symposium of the Danube Delta National Institute in September 2011.

9. Where possible **cooperation with other projects** will be stimulated through exchange of knowledge, invite speakers/participants, visit each other events, etc. For example: With the IVB project TIDE possible complementarities and additionality have already been identified. From both projects 'ambassadors' will visit the major events of the two projects to ensure a good link.

3.2.3 Detailed work plan

Please describe as precisely as possible the activities planned per semester as well as the related outputs. Outputs should be quantified and in line with the information provided in sections 2.1.4 and 3.2.1 of the application (if no activities and outputs are planned in a semester, please indicate 'not applicable' in the relevant fields).

3.3.1 Component main features		
Title	Exchange of experiences dedicated to the identification and analysis of good practices	
Total eligible costs	545.729,98 €	
Responsible partner	Province of East Flanders	
Planned results	Accumulation and improvement of knowledge and experience on sustainable governance of delta regions in Europe, through workshops and conferences on 5 themes, best practice manual, policy recommendations and new working tools	
Output indicators	Indicators	Target
	N° of interregional events (seminars, workshops, study visits, etc.) organised by the project to exchange experience	22
	Total N° of participants in all these interregional events	124
	N° of good practices identified	10
	N° of regional/local policies and instruments addressed in the field tackled by the operation	27
Possible additional output indicators	Nr of workshop reports delivered (1 per workshop)	22
	Nr of good practice & policy rec.reports delivered	6
	Nr of work plans delivered	28
Result indicators	Indicators	Target
	N° of staff members with increased capacity (awareness / knowledge / skills) resulting from the exchange of experience at interregional events	124
	N° of good practices successfully transferred (if applicable)	0
	N° of regional/local policies and instruments improved in the field tackled by the operation	9
Possible additional result indicators		

Acronym: DeltaNet

3.3.2 Component general description

Please describe the content of this component in further detail (e.g. issue tackled, proposed approach, nature of the planned activities). For further information on the components, please refer to the programme manual.

DeltaNet aims to **learn, involve and improve** their policies and tools concerning sustainable Delta governance concerning 5 themes:

- 1- Integrated Delta Approach (balance between economic & ecological priorities)
- 2- Flood & Sediment Management
- 3- Healthy Environment (wetland protection)
- 4- Delta Awareness (public participation & awareness on specific character of Delta regions)
- 5- Coordinated Delta Policy (integrated policy for optimal development)

For each of these themes will there be:

- Workshop 1 & study visit to discuss theme resulting in a practical document with good practices and policy recommendations
- A conference to present and discuss results & conference report
- Workshop 2 to define a work plan resulting in a work plan per participating partner and an overall workplan for European Deltas
- Workshop 3 to monitor and advice each other on the implementation

The partners will prepare papers in advance on their situation and their interest. These will be sent around before the workshop. At each **first workshop** there will be a discussion: 1) specific for each region and 2) general on the topic. For each practice will be asked:

- What good practice do you have concerning the topic? What makes it a good practice?
- What would be transferable? What are risks of transferring the good practice?
- How has it been started and why was it successful?
- What problem would you like to have advise in?

Each partner will describe its Delta region and ask specific questions to the experts what could be done to improve the situation. The experts will discuss together what can be learnt from the practice and how challenges might be prevented.

The next day the situation and policy recommendations concerning the topic in general will be discussed (for the local, regional, national and European level).

As a result a practical document will be elaborated

after the workshop with the good practices in a clear format and recommendations. Each partner will contribute to this document and comment on the texts.

At the **conference** the result will be presented and discussed in a larger group (all regions that are interested). The policy recommendations will be elaborated into **work plans** at the **second workshop**. Also here the discussion will be 1) what should be done specific in each region and 2) what actions should/could be taken at national and European level or in other regions? What can be improved at the short term (during project) and what at long term?

The **third** workshop will be to monitor the implementation of the work plan and provide advise to each other on how to deal with the challenges.

For practical reasons external costs for dissemination events and conferences are combined under C2, costs for thematic workshops are budgetted under C3 (4.3).

3.3.3 Detailed work plan

Please describe as precisely as possible the activities planned per semester as well as the related outputs. Outputs should be quantified and in line with the information provided in sections 2.1.4 and 3.3.1 of the application (if no activities and outputs are planned in a semester, please indicate 'not applicable' in the relevant fields).

Section 4: Budget

4.1 Budget overview by budget lines and components (in EUR)

Please provide a detailed budget by budget line and component for the partners from the EU-MS and Norway to be financed under INTERREG IVC. The amounts for the budget categories "External expertise and services" and "Equipment" have to be provided under Sections 4.3 and 4.4. Figures reported under these sections will automatically be transferred into the table below.

For further information concerning the definition of budget lines and components, please refer to the programme manual.

	Preparation activities	CP1	CP2	CP3	CP4	CP5	TOTAL per budget line		
		Management and coordination	Communication and dissemination	Exchange of experiences dedicated to the identification and analysis of good practices			EUR	%	
Staff	15.240,00	72.940,00	31.540,00	277.242,46	0,00	0,00	396.962,46	34,34 %	
Administration	2.286,00	10.941,00	4.731,00	41.587,52	0,00	0,00	59.545,52	5,15 %	
Travel and accommodation	2.000,00	75.600,00	6.400,00	94.400,00	0,00	0,00	178.400,00	15,43 %	
External expertise and services (see 4.3)	0,00	21.000,00	367.735,00	132.500,00	0,00	0,00	521.235,00	45,08 %

Partner budget (in EUR)

ERDF co-financing rate:	75%
Total amount:	211.758,88 €
ERDF Funding:	158.819,16 €
EU National Co-financing:	52.939,72 €

Please describe the relevance of this partner in the proposed project: What are the partner's competences and experiences in the field tackled? How will the partner contribute to the content of the cooperation and benefit from it? What is the capacity of the partner to directly influence local / regional policies? In the case of a Norwegian Lead Partner, please justify the reason why this partner has to be the Lead Partner.

The Province of East Flanders will be the lead partner. The province has a strong competence in the Delta region through the cooperative organisation Rhine-Scheldt Delta (BE-NL) and the presence of many functions within the Rhine-Scheldt Delta (RSD) region: e.g. world harbour Antwerp, nature areas and tourism areas in Zeeland and Brabant.

The province is highly interested in DeltaNet because:

- Of the need for European recognition of the specific problems of Delta regions in the EU: the ecological and economical potentials of these areas and the problems accruing due to this opposition between nature and logistical developments.
- RSD is very keen to learn a lot from other delta regions
- Delta regions can improve their effectiveness of their policy as other Delta regions also have to deal with the high pressure of economic and ecological needs.

The province of East Flanders is one of the two provinces filling the chairmanship of the Rhine-Scheldt Delta Steering Committee and is willing to take the lead in this interreg IVC project. Since more than ten years the Province of East Flanders is chairing the Rhine-Scheldt Delta cooperation (RSD). It is a cross-border (BE-NL) and cross-sectoral platform of 6 regional governments, local governments, port authorities and environmental bodies for debate on various issues specific to the delta region. Within this network-organisation regional policy makers and stakeholders work together in the field of mobility, economy and environment. RSD has developed a special outline for mobility and infrastructure in the Delta and also a Landscape Manifesto subscribed by the partners of the whole Delta region. This will also be the platform that will be used for the cooperation within DeltaNet.

Through DeltaNet the province of East-Flanders can strengthen the position of the Rhine-Scheldt Delta.

Please describe the previous experience of the partner in interregional cooperation and Structural Funds financed projects (if any).

The Province of East Flanders has a lot of experience in various European projects on various themes.

East Flanders participated in

- INTERREG III B projects ESCAPE and NORTHERN MARITIME CORRIDOR
- INTERREG III C projects FLAPP, PRAXIS, AWARE, COTOUR (Erov, para-provincial partner) and AUTOMOTIVE REGIONS (POM, para-provincial partner).

* The postal address of the partner determines the selection of the NUTS levels.

A list to all NUTS levels is available under http://ec.europa.eu/eurostat/ramon/nuts/codelist_en.cfm?list=nuts

	decentralized control system: independent controller to be proposed		

Partner budget (in EUR)

ERDF co-financing rate:	75%
Total amount:	159.481,88 €
ERDF Funding:	119.611,41 €
EU National Co-financing:	39.870,47 €

If, in exceptional case, the participation of this partner is not to be financed from INTERREG IVC but from its Convergence or Competitiveness programmes (see programme manual for further information), please click in the box below:

Please describe the relevance of this partner in the proposed project: What are the partner's competences and experiences in the field tackled? What is the capacity of the partner to directly influence local / regional policies? How will the partner contribute to the content of the cooperation and benefit from it?

After a successful participation process which led to the elaboration of the Integrated Protection Plan of the Ebre Delta (PIPDE) in 2006 with a potential budget of 425 million Euro - in which IRTA is strongly involved - now problems occur with the implementation of the accorded interventions, mainly because of the lack of coordination between local, regional and national administrations.

The Ebre Delta would like to learn from experiences of other DeltaNet partners (Severn, Rhine, Elbe) with organisation models that can surpass the individual interests of the different administrations and lead in an effective way to achieve common goals. From Danube new techniques for habitat/wetland restoration can be learnt. Addressing this problem on an international level will stimulate the implied administrations to make a bigger effort to work together in a more efficient way.

IRTA can contribute to the DeltaNet project by sharing its experiences as a partner of the PIPDE. The PIPDE aims to develop, through participatory methods involving all implied sectors and in accordance to the WFD, a number of environmental restoration and sustainable water management projects.

On the other hand, it can benefit from similar experiences of other DeltaNet partners. Apart from this process-oriented input, IRTA can contribute with its specific knowledge in areas such as environmental flows, wetland restoration, sediment management (crucial in flood risk prevention in deltas because of sea-level rise).

IRTA can influence policy, as a member of Commission for Sustainability of the Ebre Delta and because of close contacts with the Catalan Water Agency and the regional Catalan government. IRTA has a key role in the process of designing an integrated and sustainable management model for the lower Ebre River and its delta.

Please describe the previous experience of the partner in interregional cooperation and Structural Funds financed projects (if any).

In the framework of the Interreg programmes, IRTA is coordinating the PORTA project: Pool of Research and Transference of Food and Agricultural Technology (Interreg III A, I3A-7-102-E) with a buget of 3.920.792,97 €.

IRTA also participates as a partner in the following Interreg III A projects:

I3A-5-80-E: Control and prevention of virus transmitted by Bemisia tabaci in horticulture (1.205.770,00 €)

I3A-5-222-E: Creation of a promotion centre for organic agricultural products (916.031,00 €)

I3A-5-78-E: Interchange of references on alternatives to chemical disinfection of soils in orchards (119.772,04 €)

I3A-7-149-O: International network on applied research in large cultivations: cereals, proteaginosas and oleaginosas (395.598,00 €)

Partner budget (in EUR)

ERDF co-financing rate:	85%
Total amount:	164.219,86 €
ERDF Funding:	139.586,88 €
EU National Co-financing:	24.632,98 €

If, in exceptional case, the participation of this partner is not to be financed from INTERREG IVC but from its Convergence or Competitiveness programmes (see programme manual for further information), please click in the box below:

Please describe the relevance of this partner in the proposed project: What are the partner's competences and experiences in the field tackled? What is the capacity of the partner to directly influence local / regional policies? How will the partner contribute to the content of the cooperation and benefit from it?

The Lisbon Metropolitan Area, a river/seaside region with two ports, is facing the challenges of balancing between urban, rural, environmental and economic development. The last 10 years, there has been a joint effort by local governments, port administrations and the Government to execute various municipal plans and projects centred on the coastal and riverfront areas, which are changing the whole urban landscape of the waterfronts. The Metropolitan Area of Lisbon recognizes the importance of the exchange of experience, fact that is present in the active participation in the international nets RETE, Esturiales/AIVP.

The Estuary of the Tagus has some problems of management and familiarity with the City. The exchange of experience and discussion of several ideas in the scope of an interregional initiative and the creation of a manual of good practice would be a determinant contribution for the competitive assertion of the region.

With the public discussion of the green book of the European Maritime policy, new challenges and opportunities raise for the dock regions, fact that can be valorised in the achievement of this project.

The Lisbon Metropolitan Region is interested in participating in DeltaNet because of exchanging experiences and good practices internationally implemented in domains of the relation port/city, in the management of the estuary and in the development of new tools for the diffusion of information and new instruments that assure the public participation in the trials of argument and decision.

The Lisbon Metropolitan Region can bring experience with a congregate of 11 riverside towns, having a vast experience in the articulation of entities, initiatives and public politics with incidence in the area of the Estuary. By her relation with the town councils and by her institutional role the AML will be able to influence effectively the politics in the domains of considered intervention.

Please describe the previous experience of the partner in interregional cooperation and Structural Funds financed projects (if any).

The region has a vast experience in the participation in international projects and networks concerning subjects of the estuary areas management and the relation port/city.

Integrated Coastal Zones Management: An Atlantic Vision

Priority: C – Environment and natural resources

Measure: 2 – Integrated Coastal Zones and Estuaries Management, protection of humid zones.

The project "Integrated Coastal Zones Management: An Atlantic Vision", developed through the Communal Initiative INTERREG III B, operating program "Atlantic Space" 2000-2006, aimed to project actions and recommendations that stimulate the sustainable development of the coastal areas of the Atlantic Space, through the application of a integrated planning that behaves an efficient management.

It integrates four Thematic Actions, four Cross Actions and five partners: Spain, France, Ireland, Portugal and United Kingdom, in which the Big Metropolitan Area of Lisbon (GAML) led the thematic action NATURAL PATRIMONY

	<p>centralized control system: South-East (Bralia) Territorial Unit, Bralia Prefecture, 1, Independentei Street, room 13.</p>		

Partner budget (in EUR)

ERDF co-financing rate:	85%
Total amount:	165.641,86 €
ERDF Funding:	140.795,58 €
EU National Co-financing:	24.846,28 €

If, in exceptional case, the participation of this partner is not to be financed from INTERREG IVC but from its Convergence or Competitiveness programmes (see programme manual for further information), please click in the box below:

Please describe the relevance of this partner in the proposed project: What are the partner's competences and experiences in the field tackled? What is the capacity of the partner to directly influence regional / local policies? How will the partner contribute to the content of the cooperation and benefit from it?

The partner (DDNI) is a local governmental research body aiming to provide support for management of the Danube Delta Biosphere Reserve (DDBR). It is fully involved in development and implementation of the management plans of DDBR. DDNI has the following fields of expertise: monitoring of biodiversity, assessment of the environmental conditions and reduction of human impact, restoration of damaged ecosystems, sustainable use of natural resources, development of human settlements harmonising economic, social and ecological interests, development of informational system, elaboration of strategies for environment protection. DDNI was selected as Centre of Excellence for Deltas and Wetlands in the framework of EU FP 5.

DDNI is interested in DeltaNet to acquire new knowledge and enhance its expertise for assessment of natural and anthropogenic induced risks directly related to the status of economic and social conditions of the Danube Delta.

The direct beneficiaries of these improvements will be the management authorities and local communities facing environmental risks such as flood risk, accidental pollution and biodiversity loss as well. A particular attention will be given to the transfer of experience and best practices for development in the sensitive deltas.

DDNI has to offer experience of the largest wetland restoration project in Europe (15.712 ha in 15 years) and a multi stakeholder environment to learn from.

An other example is the elaboration by DDNI of the "Masterplan - Support For Sustainable Development Of The Danube Delta" which has been approved by the Romanian Ministry of Environment and Sustainable Development and has become part of the governance programme. Through the participation in this project the existing ability of

DDNI has is clearly able to influence the policy and policy makers through enabling them to learn new methods and best practices to address environmental issues to policy makers.

Please describe the previous experience of the partner in interregional cooperation and Structural Funds financed projects (if any).

DDNI has experience with EU projects and programmes and transnational cooperation. To mention two projects/activities:

DDNI was selected as Centre of Excellence for Deltas and Wetlands in the framework of EU FP 5 (ICA1-1999-70094).

DDNI provides support for management of the transnational Danube Delta Biosphere Reserve (DDBR)

Please describe the relevance of this partner in the proposed project: What are the partner's competences and experiences in the field tackled? What is the capacity of the partner to directly influence regional / local policies? How will the partner contribute to the content of the cooperation and benefit from it?

The Office of the Marshal of the Pomorskie Voivodeship was established in 1999 after the administrative reform creating sixteen voivodeships (regions) in Poland. Office of the Marshal - Voivodeship self-government – is responsible for the regional development policy programmes – preparation of Regional Development Strategy till 2020. Major tasks of voivodeship self authority are: economic development, education, culture, international cooperation, regional roads and transport management, water management and water transportation, land amelioration, spatial development, preservation of environment and management of European funds – preparation of Regional Operational Program 2007 - 2013.

Since the pomorskie voivodeship is located in the delta of the Vistula river, the Office of the Marshal of the Pomorskie Voivodeship is strongly involved in the preparation of the strategy of development of that area.

The Office aims to implement actions and recommendations that stimulate sustainable development of coastal areas of the Baltic Sea. One of the objectives is to create waterways in the delta of the Vistula river or to promote the use (passenger and cargo transportation) of the existing waterways and as a consequence diminish the road and train transportation. The Office and the voivodeship - as a whole together with local authorities - is looking forward to benefit from the experiences of other partners, the good practice guides of the DeltaNet project.

The Office of the Marshal would like to benefit from the experiences of other partners regarding ways to involve various social partners in actions regarding the delta development. The Vistula delta partner can share its experiences regarding environmental education.

The Office of the Marshal influences the policy through the decision of its regional Parliament, in other cases cooperation with all the communes involved is needed.

Please describe the previous experience of the partner in interregional cooperation and Structural Funds financed projects (if any).

In the framework of the Interreg programmes, Office of the Marshal of the Pomorskie Voivodeship participated among others in such projects as: Interreg IIC - "BALTSURD", Interreg IIIB - project "South Baltic Arc", Interreg IIIB - "Seagull", Interreg IIIC - "Centurio", Interreg IIIC - "Hanse Passage", Interreg IIIB - "Baltic Gateway", InterregIIIB CADES Neighbouring Programme.

Some other project: BYA - Baltic Youth Assembly - Swebaltcop - Baltic Sea Cooperation Program, "Salmon" - Ecos-OUVERTURE, "E-Minder" - 5th framework program .

Please describe the relevance of this partner in the proposed project: What are the partner's competences and experiences in the field tackled? What is the capacity of the partner to directly influence regional / local policies? How will the partner contribute to the content of the cooperation and benefit from it?

As a port authority the Hamburg Port Authority (HPA) manages the second largest port in Europe. The port is located at the end of the Elbe estuary which is almost completely designated as NATURA 2000 site. Furthermore the Elbe estuary in large parts belongs to the German Länder Schleswig-Holstein and Lower Saxony, the shipping lane itself to the Federal Administration of Waterways. Due to these complex boundary conditions, cross boundary cooperation and the implication of a broad regulatory framework is a daily challenge. The HPA has taken a leading role in integrating all the different concerns at the Elbe estuary. A first concept for the sustainable development of the Tidal Elbe River as an artery of the metropolitan region Hamburg and beyond has been developed. The concept is taking into account aspects of sediment management, river engineering, nature conservation, tourism, agriculture, settlement, recreation, flood risk protection etc.

Currently also a management plan according to the Habitats Directive is being developed in close cooperation of the Länder Hamburg, Schleswig-Holstein, Lower Saxony, the Federal Administration of Waterways and the HPA.

The HPA will contribute with its comprehensive experiences in managing typical estuary related topics from the perspective of a port authority. It will benefit from the cooperation as estuary and delta management can only be successful if understood in a European context. HPA wants to learn from other regions how they have managed the challenge of communication and dealing with different responsibilities (e.g. Länder) at one system (the estuary). How can a holistic management approach for a delta region be implemented? Identifying best practices in delta governance and communication processes will give additional guidance to the ambitious duties of the HPA.

HPA can influence policies via the supervisory administration and working and steering groups.

Please describe the previous experience of the partner in interregional cooperation and Structural Funds financed projects (if any).

The Hamburg Port Authority has experience with INTERREG Projects.

It is for example the lead partner of the INTERREG IIIB project PortNet - Port-Net's objective was to identify and tackle the main challenges faced by European ports in order to create better operational structures and capacities and achieve the best possible regional integration of ports

Partner budget (in EUR)

ERDF co-financing rate:	75%
Total amount:	100.591,88 €
ERDF Funding:	75.443,91 €
EU National Co-financing:	25.147,97 €

If, in exceptional case, the participation of this partner is not to be financed from INTERREG IVC but from its Convergence or Competitiveness programmes (see programme manual for further information), please click in the box below:

Please describe the relevance of this partner in the proposed project: What are the partner's competences and experiences in the field tackled? What is the capacity of the partner to directly influence regional / local policies? How will the partner contribute to the content of the cooperation and benefit from it?

As Minho Delta has an important problem regarding the accumulation of sand in the river mouth, learning about sediment management is the first interest, and also to solve pollution problems and finally learning how interregional cooperation can be improved. The interest is to exchange knowledge in order to find the best answers. Especially fostering a better coordination between the Portuguese and Spanish governments is an indispensable condition to improve the possibilities of the DELTA ecological survival.

Vigo University has 20 years of experience in designing and proposing management tools for natural resources, which is in fact one of its fields of specialisation. The Minho partner has expertise and on developing models to assess socio-economic and ecological impact of activities on areas, such as delta areas, as well as to work within multi- and trans-disciplinary teams.

The outcomes of the DeltaNet project will benefit many actors in the Minho Delta. Specifically, among the different organisations, which will be involved in and related to the Minho delta team, are COREMA and ANABAM (ecological organisations of Galicia and Portugal); Associaciao de Pescadores do Rio Minho e do MAR and Asociación de Pescadores Galegos do Rio Minho (professional associations of Portuguese and Galician sailors); the Câmara Municipal de Vilanova de Cerveira and the Concello de A Guarda (local Portuguese and Galician authorities); and last but not least, the Regional Galician Water Government (Augas de Galicia), which has the main local responsibilities in water management. The documents elaborated within DeltaNet as a result of knowledge and experience exchange among the different partners will find a wide room of dissemination within those organisations.

Please describe the previous experience of the partner in interregional cooperation and Structural Funds financed projects (if any).

Augas de Galicia has already previous experience in INTERREG in the period 2000-2006, carrying out an economic analysis on water uses involving 98 municipalities that spill their waters into the rivers Minho and Limia (<http://augasdegalicia.xunta.es>). Dr. Simón participated in the project "Common Property and Use and their implications for the rural development of peripheral areas" within the Programme FAIR. Moreover, Vigo University has a wide involvement in international and cross-border projects and has led several INTERREG projects: TRANSPORTUGAL GALICIAN NETWORK involves Miño and Vigo universities, Centro de Supercomputacion de Galicia (CESGA) and Portuguese Centro de Computacao Gráfica. Vigo university is also participating in the CECOTRAN project to improve the competitive potential of the Euroregion. Other projects are @RTEC, CEER, NATURPLAS, COOPNAV, TRANS-BIOCOMB, PIMHAI, NATURPLAS 2, DESOOP, CAMPUS REDE, PROTEUS, and CSI. For more details contact otri9@uvigo.es.

The Local Government of El Prat is very interested in DeltaNet.

El Prat is already participating in a lot of projects concerning Delta relevant aspects like the enlargement of the port, the modification of the last four kilometres of the Llobregat River, the restoration and public management of the wetlands near the River.

Conservation the beaches of the Delta as a natural areas is their aim. Because of the experience of the competence of the Local Government in the issues of the project it is important.

El Prat will contribute with their experience and knowledge in order to share it with the other partners and they want to benefit from the experience of the others - specially in management of wetlands and Rivers in big Deltas with a high density of population and economic activities.

Please describe the previous experience of the partner in interregional cooperation and Structural Funds financed projects (if any).

AIRE Poject --- Leonardo- expected - 2007 - 2009 - Aim: To meet the training needs of airport related companies and the employment need of local communities. Objective: To identify common needs and existing best practices of airport-related vocational education. To develop and disseminate the Airport Regions E-learning Academy, AIREA.

INTERREG IIIC - STRAIR - 2005 - 2007 - Strategic Development and Cooperation between Airport Regions - Objective: look into what effects (environmentally and economical) relocation of an international airport have locally. Mapping and output from the knowlege and experience, and verification of successful examples are made. Budget of project : 250000 € - funding 125000 €

What is the capacity of the partner to directly influence regional / local policies? How will the partner contribute to the content of the cooperation and benefit from it?

Cardiff University has hosted the Severn Estuary Partnership (SEP) since the late 1990s. The Severn Estuary has many issues relating to local and regional governance in common with the Rhine-Scheldt Delta and other European Deltas worthy of further exploration. SEP is a non-legal body hosted by Cardiff University to provide a neutral co-ordination platform to encourage stakeholders around the estuary to work together towards sustainable management.

The co-ordination from Cardiff University will be undertaken by the Severn Estuary Secretariat with promotion of the project to a wide range of local authorities, government agencies and other organisations working together for the sustainable management of the Severn Estuary.

The Severn Estuary had less financial possibilities for the DeltaNet project but will be investing through staff capacity.

Please describe the previous experience of the partner in interregional cooperation and Structural Funds financed projects (if any).

INTERREG IIIb Integrated Coastal Zones Management: An Atlantic Vision 2003-2006. Severn Estuary Partnership (SEP) led the 'stakeholder involvement' theme within Cardiff University. Cardiff University provide the Secretariat for SEP and are involved in the Interreg IIIb COREPOINT project and recently awarded IMCORE project. Members of the Esturiales network have collaborated since the early 1990s on projects (e.g. Cybestuaries funded by EU LIFE) and for seminars & conferences across Europe - recently including those in the UK (Severn Estuary) and Portugal (Tagus Estuary) in 2007, Poland (Tagus Estuary) in 2006 and France (Gironde Estuary) in 2005. Collaboration and joint financing for the network continues to provide for a voluntary network of collaboration between estuaries across Europe. The Secretariat for the European 'Les Esturiales' network has resided with the SEP since 2006.
